Vitamins & Minerals

There are vitamins and supplements that can help boost your immune system to reduce the severity of infections and shorten the duration of illnesses caused by viruses and bacteria. Many vitamins can be found in our daily diet, especially by following Canada's Food Guide. However, due to your activity or condition, you may require additional vitamins and minerals which are available as supplements. Consult with your pharmacist who can help make recommendations based on your needs.

Vitamin A - Retinol
Needed for tissue in the respiratory and digestive tracts

Vitamin C - Ascorbic Acid
Strengthens the immune system to reduce the duration of cold symptoms

Vitamin D
Absorbs calcium that supports healthy teeth, bones, facilitates normal immune system function

Vitamin E - Tocopherol
Antioxidant, supports immune system, helps skin healing and prevents scarring

VITAMINS

Iron
Enables red blood cells to carry oxygen and white blood cells to fight infections

Selenium
Supports cognitive function and healthy immune system

Zinc
Strengthens the immune system; helps wound healing, sense of taste and smell
